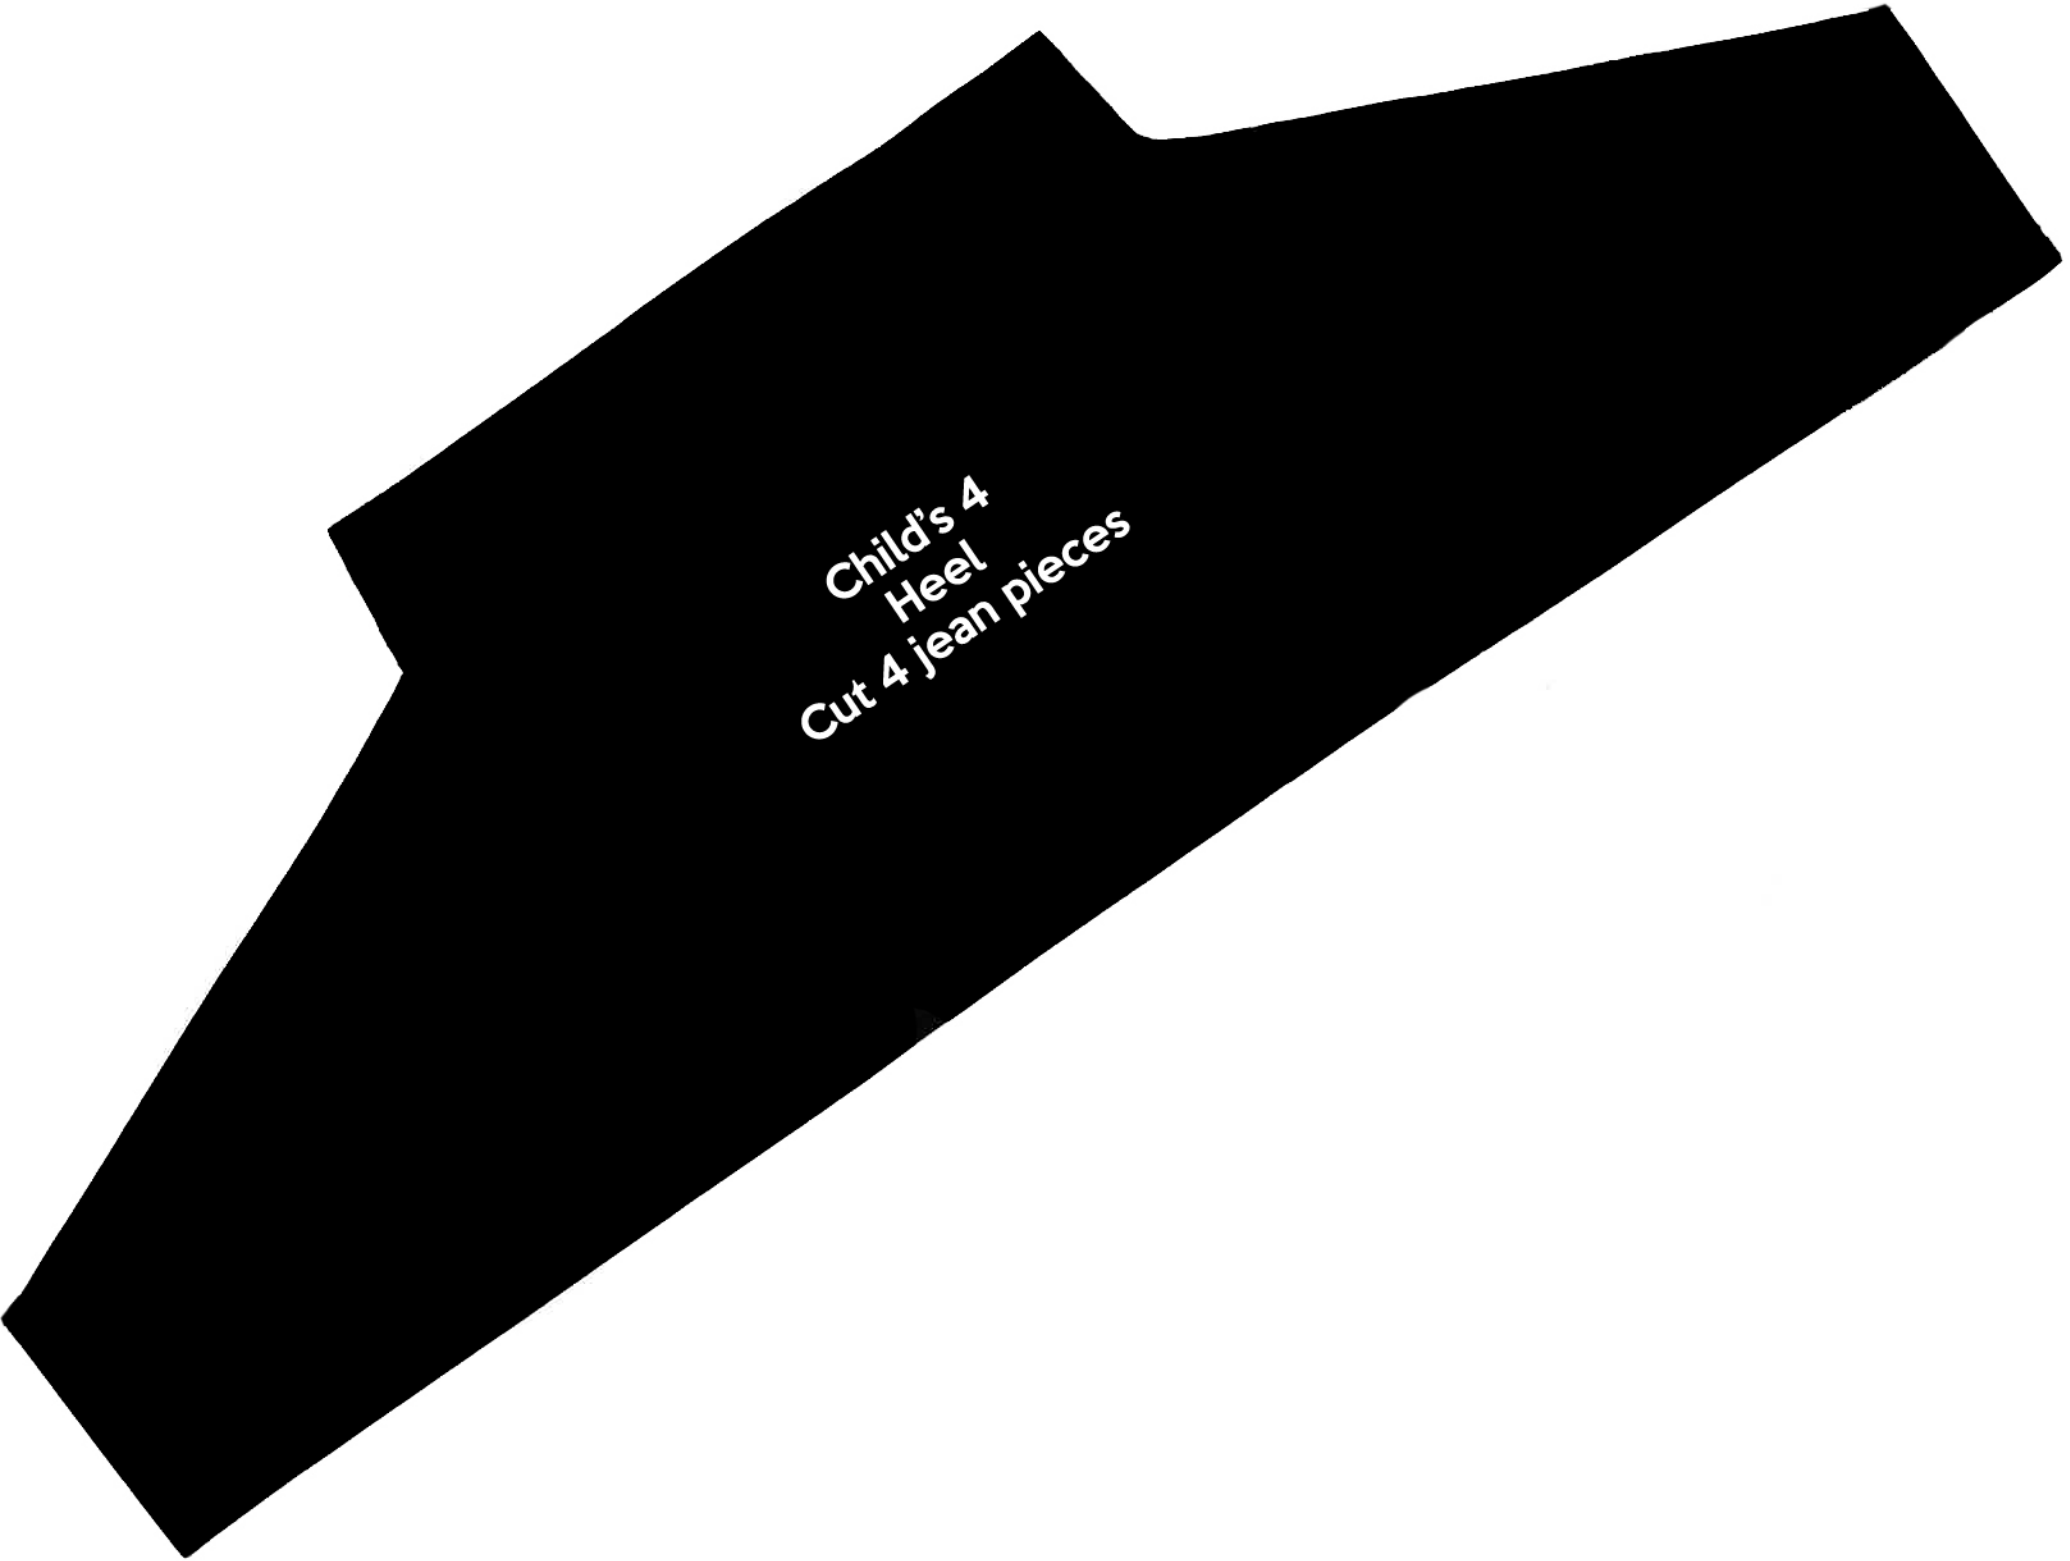
Child's 4
Heel Patch
Cut 2 jean and 2 plastic
Label plastic with shoe size

Child's 4
Vamp
Cut 4 jean pieces



Child's 4
Heel
Cut 4 jean pieces

SUPPLIES

- An old pair of jeans!
- A plastic folder like this one: https://www.officedepot.com/a/products/468581/Office-Depot-Brand-2-Pocket-Poly
- A sharpie for tracing
- Some large safety pins

INSTRUCTIONS

STEP 1

Print the attached template. IMPORTANT: Make sure your printer is set to print the image at 100% scale. Your printer may automatically adjust this as to not cut off any of the image, but if that is the case the pattern will not be the correct shoe size!

STEP 2

Cut out each pattern!

STEP 3

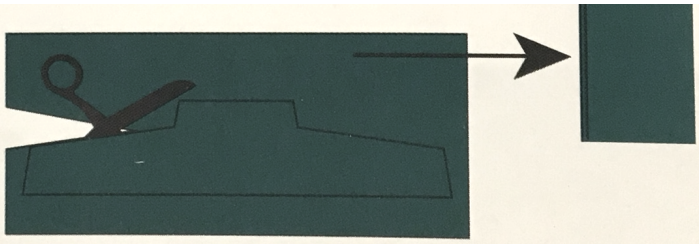
Grab your old denim and trace each pattern on the INSIDE of the fabric. Each pair of shoes requires 4 of each piece (the smallest pieces require 2 denim and 2 plastic)

Trace the template on the INSIDE of the denim

COMMON MISTAKES: Not tracing the pattern accurately. Make sure you leave about 1/2 inch in between each traced piece so there is room to cut.

STEP 4

Cut!



Cut with standard fabric shears

COMMON MISTAKES: Not cutting on the outside of the line as shown in the picture.

STEP 5

Use a large safety pin to pin all pieces of a pair of shoes together! (And be careful)!

STEP 6

Repeat as many times as you like!

STEP 7

Place materials for each pair of shoes in the Sole Hope tub at VOM or VOA between Oct. 18-25. Shoes will be assembled in Uganda and provided to children to prevent parasites called jiggers. Learn more at solehope.org
